# 4800 Series VacuFlush Toilets

Powerful, efficient flush. Luxurious comfort.

**Dual-Flush  
Water-Saving  
Modes!**

VacuFlush 4809 toilet  
with VFS flush switch  
(ordered separately;  
see page 9)

SeaLand 4800 series all-ceramic VacuFlush® toilets bring water-efficient flushing to a new level. Boatowners can now choose between two flush modes to suit their personal preference or conserve resources – without sacrificing the powerful, bowl-clearing performance of a VacuFlush system.

Using only 0.25 gal. (0.95 liter) per flush in the “normal” mode or 0.125 gal. (0.5 liter) in the “low” mode, 4800 series toilets greatly extend holding tank capacity between pump-outs as compared to other marine toilets. In the “low” mode, very little water remains in the toilet after flushing. This prevents splashing water out of the bowl while a boat is underway or in rough seas.

VacuFlush 4800 series toilets provide an abundance of features to enhance installation and performance. The contemporary shape features a compact footprint to fit in most any head compartment. Models are available in low-profile and standard-height units. Discriminating owners have these options: toilet or toilet/bidet combination unit; matching bidets; white or bone colors.

Toilet/bidet models combine electronic-flush operation with manually controlled, variable temperature bidet wash. Features gentle, aerated water flow.

## Key Benefits

- Powerful vacuum flush
- Ultra low water consumption in two modes – “normal” flush at 0.25 gal. (0.95 l) or “low” flush at 0.125 gal. (0.5 l)
- VacuFlush wall switch; compatible with popular Vimar and Gewiss frames (not included)
- Small footprint – fits in most any head compartment
- “Soft-close” thermoset seat
- Standard and low-profile heights
- Automatic “full tank” shutdown prevents overfilling the holding tank (when connected to tank level indication system)
- Service mode allows cleaning or other service without running water
- Toilet/bidet combination models available (white only)
- Matching free-standing bidet available
- 12 V DC or 24 V DC operation

## Technical Specifications for 4800 Series VacuFlush® Toilets

MODEL	DESCRIPTION	DISCHARGE
4806	Low-profile all-ceramic VacuFlush electric toilet	through the floor, 1.5 in./38 mm dia. plumbing, vacuum
4826	Low-profile all-ceramic VacuFlush electric toilet/manual bidet combination (white only)	through the floor, 1.5 in./38 mm dia. plumbing, vacuum
4809	Standard-height all-ceramic VacuFlush electric toilet	through the floor, 1.5 in./38 mm dia. plumbing, vacuum
4848	Standard-height all-ceramic VacuFlush electric toilet	above the floor, 1.5 in./38 mm dia. plumbing, vacuum
4828	Standard-height VacuFlush electric toilet/manual bidet combination (white only)	above the floor, 1.5 in./38 mm dia. plumbing, vacuum
4829	Standard-height VacuFlush electric toilet/manual bidet combination (white only)	through the floor, 1.5 in./38 mm dia. plumbing, vacuum
4801	Standard-height manual bidet	through the floor, 1.5 in./38 mm dia. plumbing, gravity
4802	Low-profile manual bidet	through the floor, 1.5 in./38 mm dia. plumbing, gravity

Toilets available in white and bone colors. 12 V DC and 24 V DC models available. Flush switch must be ordered separately (see page 9). Specifications subject to change without notice.

## 4800 Series VacuFlush System Requirements

<b>ELECTRICAL</b>	Toilet amp draw	2 amp @ 12 V DC; 1 amp @ 24 V DC
	Toilet circuit breaker/fuse	5 amp @ 12 V or 24 V DC
	Vacuum source* draw	6 amps/12 V DC; 3 amps/24 V DC)
	Vacuum source* circuit breaker/fuse	10 amps/12 V DC; 5 amps/24 V DC)
<b>WATER SUPPLY</b>	ID	0.5 in. NPT
	Flow rate	2.0 gpm/7.6 lpm minimum at toilet
<b>DISCHARGE</b>	Hose/PVC pipe ID	1.5 in./38 mm
	Horizontal run**	50 ft./15 m maximum to vacuum source
	Vertical run**	6 ft./1.8 m maximum to vacuum source
<b>REQUIRED COMPONENTS</b>	Electric flush switch †	Dometic VFS or VFP model
	Vacuum source †	VacuFlush vacuum generator, vacuum holding tank, or holding tank system

\* Required for J and S series VacuFlush vacuum generators.

\*\* Based on J and S series VacuFlush vacuum generator specifications. Where applicable, see VHT series vacuum holding tank manual for other installation specifications.

† Purchased separately.

Specifications subject to change without notice.

## Dimensions

## VacuFlush Switch Panels

VacuFlush wall-mounted flush switches feature backlit push buttons for easy use, even in low light. The VFS model includes a generic frame, or can be fitted with a Vimar Idea, Vimar Eikon, or Gewiss Chorus frame. The VFP model accommodates a Gewiss Playbus frame.

See page 9 for details.

## Water-saving Flush Settings

To reduce water consumption from 1 US quart (0.95 l) to 1 US pint (0.5 l) per flush, change from “Normal” to “Low” flush option by pressing “flush” switch for about five seconds. When “power on” light begins flashing, release “flush” switch. Flush setting has been changed. Change back to “Normal” setting in the same manner.

# 4700 Series VacuFlush Toilets

Powerful performance. Premium comfort.

4700 series  
VacuFlush toilet  
with electronic  
flush handle

VacuFlush 4709 toilet  
with VFS flush switch  
(ordered separately;  
see page 11)

Get the water-conserving efficiency of VacuFlush technology in an opulent, residential-scale toilet with SeaLand VacuFlush 4700 series toilets from Dometic. Upscale style and electronic operation perfectly complement today's tastes in motor yacht design and convenience.

With freshwater flushing, instantaneous evacuation of bowl contents, and thorough rinsing action, VacuFlush 4700 series toilets deliver sparkling clean, odor-free performance. Using only 0.33 gal. (1.26 liter) per flush in the "normal" mode or 0.10 gal. (0.39 liter) in the "low" mode, 4700 series toilets greatly extend the use of a holding tank between pump-outs as compared to manual and other electric toilets. In the "low" mode, very little water remains in the toilet after flushing. This prevents splashing water out of the bowl while a boat is underway or in rough seas.

SeaLand VacuFlush 4700 series toilets provide an abundance of features to satisfy diverse owner preferences and boatbuilder requirements. 4700 series toilets come in standard-height units with above-floor or below-floor discharge options. Electronic flushing can be activated by either a residential-style handle or wall-mounted switch. Additional options include a choice of white or bone colors.

## Key Benefits

- Powerful vacuum flush
- Ultra low water consumption in two modes – "normal" flush at 0.33 gal. (1.26 l) or "low" flush at 0.10 gal. (0.39 l)
- VacuFlush wall switch; compatible with popular Vimar and Gewiss frames (not included)
- Flat-back design – fits against bulkheads
- Residential-style wood seat with elongated opening
- Automatic "full tank" shutdown prevents overfilling the holding tank (when connected to tank level indication system)
- Service mode allows cleaning or other service without running water
- 12 V DC or 24 V DC operation

Dimensions

VacuFlush Switch Panels

VacuFlush wall-mounted flush switches feature backlit push buttons for easy use, even in low light. The VFS model includes a generic frame, or can be fitted with a Vimar Idea, Vimar Eikon, or Gewiss Chorus frame. The VFP model accommodates a Gewiss Playbus frame.

See page 9 for details.

Water-saving Flush Settings

To reduce water consumption, change from “Normal” to “Low” flush option by pressing “flush” switch for about five seconds. When “power on” light begins flashing, release “flush” switch. Flush setting has been changed. Change back to “Normal” setting in the same manner.

# 4600 Series VacuFlush Toilets

High-powered performance in a versatile fixture

VacuFlush 4609 toilet  
with VFS flush switch  
(ordered separately;  
see page 9)

Enjoy the premium look of an all-ceramic toilet, yet in a compact size that allows installation in a wide range of yachts and head compartment layouts, with SeaLand 4600 series all-ceramic VacuFlush® toilets. Its upscale style and electronic flush switch operation perfectly complement today's taste in boat designs and conveniences.

With freshwater flushing, instantaneous evacuation of bowl contents, and thorough rinsing action, VacuFlush 4600 series toilets deliver sparkling clean, odor-free performance. Using only 0.25 gal. (0.95 liter) per flush in the "normal" mode or 0.125 gal. (0.5 liter) in the "low" mode, 4600 series toilets greatly extend the use of a holding tank between pump-outs as compared to manual and other electric toilets. In the "low" mode, very little water remains in the toilet after flushing. This prevents splashing water out of the bowl while a boat is underway or in rough seas.

SeaLand VacuFlush 4600 series toilets satisfy diverse owner preferences and meet virtually any boatbuilder requirement. The contemporary shape features a compact footprint to fit in most any head compartment. They are available in low-profile and standard-height units; white or bone colors; and in 12 V DC or 24 V DC models.

## Key Benefits

- Powerful vacuum flush
- Ultra low water consumption in two modes – "normal" flush at 0.25 gal. (0.95 l) or "low" flush at 0.125 gal. (0.5 l)
- VacuFlush wall switch; compatible with popular Vimar and Gewiss frames (not included)
- Flat-back design – fits against bulkheads
- "Soft-close" thermoset seat
- Standard and low-profile heights
- Automatic "full tank" shutdown prevents overfilling the holding tank (when connected to tank level indication system)
- Service mode allows cleaning or other service without running water
- Integrated fuse (toilet only) – easy to reset
- Matching free-standing bidet fixtures available
- 12 V DC or 24 V DC operation

### VacuFlush Switch Panels

VacuFlush wall-mounted flush switches feature backlit push buttons for easy use, even in low light. The VFS model includes a generic frame, or can be fitted with a Vimar Idea, Vimar Eikon, or Gewiss Chorus frame. The VFP model accommodates a Gewiss Playbus frame.

See page 9 for details.

### Water-saving Flush Settings

To reduce water consumption from 1 US quart (0.95 l) to 1 US pint (0.5 l) per flush, change from “Normal” to “Low” flush option by pressing “flush” switch for about five seconds. When “power on” light begins flashing, release “flush” switch. Flush setting has been changed. Change back to “Normal” setting in the same manner.

**Dometic**  
SEALAND

# VacuFlush® Toilet Flush Switch Panels

## Versatile designs fit popular Vimar, Gewiss frames

### Key Benefits

- Complete add water/flush control at the touch of a button
- Integrated vacuum status/power lights indicate when toilet is ready to flush
- Backlit push buttons offer easy location for user, even in dark
- Adaptable with popular Vimar and Gewiss trim frames
- “Service” mode keeps flush ball open for cleaning or other service operation
- Fast installation with ethernet cable (RJ45 connectors)
- CE approved
- 12 V DC or 24 V DC operation

Panels fitted with Vimar and Gewiss frames will vary in appearance and size.

### Dimensions (actual size shown)

3.42 in. w x 3 in. h / 89 mm x 76 mm – VFS panel with standard frame

For electronic-flush VacuFlush toilet models, our wall-mounted flush switches offer streamlined styling while delivering user-friendly push-button operation. The VFS model includes a standard Dometic frame, yet it also can be fitted with a Vimar Idea, Vimar Eikon, or Gewiss Chorus frame to complement a boat’s existing electronic switch design. The VFP model will accommodate only a Gewiss Playbus-style frame.

MODEL	DESCRIPTION	COLOR	VOLTAGE	ITEM
VFS	VacuFlush switch panel - standard	gray	12/24	313408010
		white	12/24	313408020
VFP	VacuFlush switch panel - Gewiss Playbus-style	gray	12/24	313408030

VFS standard panel fits Dometic, Vimar Eikon, Vimar Idea, and Gewiss Chorus frames. VFP will retrofit with Gewiss Playbus frames. All flush switch panels include 10 ft./3 m electrical cable that connects to flush switch and all-ceramic VacuFlush toilet circuit board. Specifications subject to change without notice.

“Do Not Flush” light indicates that toilet system vacuum is recharging or that holding tank is full (when connected to SeaLand tank level indication system).

# VacuFlush® Status Panels

Assures readiness of VacuFlush toilets

## DVS01 Status Panel

Designed primarily for pedal-style VacuFlush toilets, the SeaLand DVS01 panel indicates when electrical power to the toilet system is turned on, and when the vacuum level is ready for flushing (green light). When vacuum is recharging or the holding tank is full (if connected to a “full tank” sensor), the red light illuminates to indicate that the toilet should not be flushed.

### Key Benefits

- Continuous monitoring of toilet system's vacuum status
- Operates on only 16 mA @ 12 V DC or 24 V DC
- Complements other SeaLand panels and controls

Item no. 313535000 - 12 V DC or 24 V DC

### Dimensions

3.25 in. w x 2 in. h / 83 mm x 51 mm

## DNF Status Panel

SeaLand “Do Not Flush” panel connects to a VacuFlush toilet system to indicate two conditions: insufficient vacuum for toilet operation, or that the toilet system power is off due to a full holding tank (must be connected to shut-down relay).

### Key Benefits

- Operates on only 16 mA @ 12 V DC or 24 V DC
- Complements other SeaLand panels and controls

Item no. 313712000 - 12/24 V DC, black

### Dimensions

3.25 in. w x 2 in. h / 83 mm x 51 mm

## DVS02 Status Control Panel

SeaLand DVS02 panel makes a VacuFlush toilet system easier and more efficient to use. Lights indicate when there is enough vacuum pressure for an effective flush, when vacuum is insufficient for flushing, or when the holding tank is full (if connected to a “full tank” sensor). The power switch allows turning off electrical power to the vacuum system during periods when the toilet is not in use.

### Key Benefits

- Continuous monitoring of toilet system's vacuum status
- Easy control of VacuFlush toilet system power
- Operates on only 12-16 mA @ 12 V DC or 24 V DC
- Complements other SeaLand panels and controls

Item no. 313530012 - 12 V DC, black  
 Item no. 313530024 - 24 V DC, black  
 Item no. 313530112 - 12 V DC, white  
 Item no. 313530124 - 24 V DC, white

### Dimensions

3.25 in. w x 3.25 in. h / 83 mm x 83 mm

# 5000 Series VacuFlush® Toilets

Compact Design. Powerful, Efficient Flush.

Model 5009  
VacuFlush Toilet

SeaLand 5000 series VacuFlush® toilets deliver many value-added benefits of a vacuum toilet system to a wide range of boat installations.

The clean, odor-free performance of VacuFlush 5000 series toilets is the result of freshwater flushing, instantaneous evacuation of bowl contents, and thorough rinsing action. Using only 0.13 US gal. (0.5 liter) per flush, 5000 series toilets greatly extend the use of a holding tank between pump-outs as compared to manual and other electric toilets which consume three or four times more water. An integral water-line check valve provides anti-siphon protection for freshwater systems.

Available in three heights, the 5000 series will accommodate diverse floor plans, including placement on raised platforms. Shallow front-to-back footprint dimensions allow boatowners fit one in virtually any space. All three sizes are available in sparkling white and bone colors.

## Pedal Lock

5140 series VacuFlush® toilets include a pedal lock. When installed in a toilet system with a VHT 12, VHT 4500, or VHT 5200 vacuum holding tank, the pedal lock holds the flush ball open to allow positive air pressure into the holding tank during pump-out. This helps assure thorough discharge of the holding tank.

## Key Benefits

- Powerful vacuum flush; foot-pedal activated
- Ultra low water consumption – only 1 pint (0.5 liter) per flush
- Small footprint – fits in most any head compartment
- Full-size residential-style wood seat.
- Deep, household-size bowl
- Three heights available – standard, medium and low-profile
- Through-the-floor or through-the-wall discharge options
- 12 V DC or 24 V DC operation (connects to VacuFlush vacuum generator or holding tank system)

## Technical Specifications for 5000 Series VacuFlush® Toilets

MODEL	DESCRIPTION	DISCHARGE	WEIGHT**
5006	Low-profile VacuFlush toilet	through the floor*	27 lbs./12.2 kg

 $\pm$  0.375 in. (10 mm)

# 500 and 700 Series VacuFlush® Toilets

Powerful performance, premium efficiency

Model 506+  
VacuFlush Toilet

Model 509+  
VacuFlush Toilet

## 500 Plus Series VacuFlush Toilets

Thousands of boatowners worldwide enjoy the easy operation, robust flush, and worry-free advantages of SeaLand 500 Plus series VacuFlush toilets. Elongated seat and deep bowl provide the most home-like comfort available in pedal-flush toilets. Miserly water consumption extends freshwater resources as well as holding tank use between pump-outs. An integral vacuum breaker protects the water supply, and the anti-splash rim keeps water in the bowl while underway. With a wide selection of color, height and discharge options, it's easy to specify a 500 Plus VacuFlush toilet to fit most any boat.

### Key Benefits

- Elongated, solid seat for comfort and support
- As little as 1 pint (0.5 l) per flush
- Foot-pedal operation adds water, flushes toilet
- Standard-height and low-profile models
- Below-floor and multiple above-floor discharge options
- Available in white, bone, platinum, ebony colors

## 706 VacuFlush Toilet

With the ultra-compact model 706, a VacuFlush toilet can be fitted to smaller boats, and deliver the same powerful flush as larger VacuFlush toilet models.

### Key Benefits

- Compact size fits small compartments
- As little as 1 pint (0.5 l) per flush
- Solid seat for home-like comfort
- Foot-pedal operation adds water, flushes toilet
- Integral vacuum breaker protects water supply
- Below-floor discharge; rotates 360°
- Available in white, bone colors

Model 706  
VacuFlush Toilet

# 140 Series VacuFlush® Toilets

## Compact Size For Small Head Compartments.

Model 149  
VacuFlush Toilet

140 series VacuFlush® toilets meet the special demands of sailboats and smaller motor yachts without sacrificing the high-powered performance of larger VacuFlush toilets.

Medium-profile 140 toilet models provide a comfortable seat height when installed on raised platforms. Dimensions and plumbing configurations make the 140 series an instant replacement for older manual marine toilets, providing much easier and sanitary flushing performance.

Clean, odor-free performance results from freshwater flushing, instantaneous evacuation of bowl contents, and thorough rinsing action. Using only 0.13 US gal. (0.5 liter) per flush, 140 series VacuFlush toilets greatly extend the use of a holding tank between pump-outs as compared to manual and other electric toilets which consume three or four times more water. A vacuum breaker provides anti-siphon protection for freshwater systems. All models are available in sparkling white and bone colors.

### Pedal Lock

140 series VacuFlush® toilets include a pedal lock. When installed in a toilet system with a VHT 12, VHT 4500, or VHT 5200 vacuum holding tank, the pedal lock holds the flush ball open to allow positive air pressure into the holding tank during pump-out. This helps assure thorough discharge of the holding tank.

### Key Benefits

- Powerful vacuum flush; foot-pedal activated
- Small footprint – fits in most any head compartment
- Ultra low water consumption – only 1 US pint (0.5 liter) per flush
- Premium-strength wood seat
- Pedal lock keeps flush ball open for thorough holding tank pump-out or other toilet system service
- Atmospheric vacuum breaker protects freshwater supply from backflow
- Four discharge options – through-the-floor; or above-the-floor left-side, right-side or back
- For 12 V DC or 24 V DC VacuFlush systems (connects to vacuum generator, VHT, or holding tank system)

## 140 Series Technical Specifications

MODEL	DESCRIPTION	DISCHARGE	WEIGHT**
146	Medium-height VacuFlush toilet	through the floor*	27 lbs./12.2 kg
147	Medium-height VacuFlush toilet	above the floor, right	27 lbs./12.2 kg
148	Medium-height VacuFlush toilet	above the floor, rear	27 lbs./12.2 kg
149	Medium-height VacuFlush toilet	above the floor, left	27 lbs./12.2 kg

\* Hose or pipe discharge connection. All others use hose only.

\*\* Weights may vary  $\pm$  2-3 percent.

All models are available in white or bone color.

Specifications subject to change without notice.

## 140 Series VacuFlush System Requirements

ELECTRICAL	Vacuum pump* draw	6 amps/12 V DC; 3 amps/24 V DC)
	Vacuum pump* circuit breaker/fuse	10 amps/12 V DC; 5 amps/24 V DC)
WATER SUPPLY	ID	0.5 in. NPT fitting
	Flow rate	2.0 gpm/7.6 lpm at toilet, minimum
DISCHARGE	ID	1.5 in./38 mm ID plumbing
	Horizontal run**	50 ft./15 m maximum to vacuum source
	Vertical run**	6 ft./1.8 m maximum to vacuum source
REQUIRED COMPONENT	Vacuum source †	VacuFlush vacuum generator, vacuum holding tank, or holding tank system

\* Required for J and S series VacuFlush vacuum generators.

\*\* Based on J and S series VacuFlush vacuum generator specifications. Where applicable, see VHT series vacuum holding tank manual for other installation specifications.

† Purchased separately.

Specifications subject to change without notice.

## Dimensions

Model 148  
VacuFlush Toilet

# VacuFlush® Vacuum Components

## The Heart of VacuFlush® Power

J series  
vacuum generator

S series low-profile  
vacuum generator

### J Series Vacuum Generator (model VG4)

As the most versatile, efficient and quiet vacuum sources developed by Dometic, J series vacuum generators offer boatbuilders more reasons than ever to install premium VacuFlush toilet systems. Along with the most efficient water and power consumption, they operate much more quietly than macerator toilet motors, and can be configured to most any marine plumbing application.

#### Key Benefits

- Adjustable components accommodate diverse layouts
- Large 2 in./51 mm ID openings improve flow
- Precise tolerances of injection-molded tank optimize efficiency and reliability
- Pre-wired and assembled

**Available in 12 V DC and  
24 V DC models**

### S Series Low-profile Vacuum Generator (model LPVG)

Where space is limited, this low-profile unit is the perfect fit. Provided as a single unit, the whisper-quiet pump and sturdy polyethylene tank can also be installed separately for unique applications.

#### Key Benefits

- Creates powerful vacuum for all VacuFlush toilets
- Vacuum pump and tank can be plumbed up to 3 feet (0.9 m) apart if necessary (requires additional sanitation hose)
- Pre-wired and assembled

**Available in 12 V DC  
and 24 V DC models**

### J and S Series Vacuum Generator Requirements

ELECTRICAL	Power draw (avg.)	6 amps @ 12 V DC; 3 amps @ 24 V DC
	Circuit breaker/fuse*	10 amps @ 12 V DC; 5 amps @ 24 V DC
INLET PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run	50 ft./15.2 m max. from toilet discharge
	Vertical run	6 ft./1.8 m max. from toilet discharge
DISCHARGE PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run	20 ft./6.1 m max. to holding tank
	Vertical run	6 ft./1.8 m max. to holding tank
REQUIRED COMPONENT	VacuFlush toilet †	

\* Requires separate circuit breaker or fuse from other electrical equipment.

† Purchased separately. Electronic-flush VacuFlush toilets require separate electrical circuit. Refer to toilet specifications. Specifications subject to change without notice.

## M Series Vacuum Pump (model M)

Install up to eight VacuFlush toilet/vacuum tank combinations to ONE super-powerful M series vacuum pump. It's ideal for multi-head superyachts and heavy-use charters or rentals.

### Key Benefits

- Heavy-duty bronze body
- Runs dry without damage
- Passes objects up to 1 in. (25 mm) diameter
- 1/2-HP motor, standard (3/4-HP motor, optional)

M series vacuum pump

## M Series Vacuum Pump Requirements

ELECTRICAL	Power draw (avg.)	40 amps @ 12 V DC; 20 amps @ 24 V DC; 8 amps @ 115 V AC
	Circuit breaker/fuse*	50 amps @ 12 V DC; 25 amps @ 24 V DC; 10 amps @ 115 V AC
INLET PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run**	unspecified
DISCHARGE PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run	20 ft./6.1 m max. to holding tank
	Vertical run	6 ft./1.8 m max. to holding tank
REQUIRED COMPONENTS	Vacuum tank, VacuFlush toilet †	

\* Requires separate circuit breaker or fuse from other electrical equipment.

\*\* Recommend run to be parallel to or lower than vacuum tank discharge outlet.

† Purchased separately.

Specifications subject to change without notice.

Available in 12 V DC, 24 V DC and 115V AC models

## S Series Vacuum Pump (model S)

Proven in thousands of motor yachts, our bellows-style vacuum pump has been powering VacuFlush toilets for over 30 years. Connects to separate vacuum tank (model VT).

## S Series Vacuum Pump Requirements

ELECTRICAL	Power draw (avg.)	6 amps @ 12 V DC; 3 amps @ 24 V DC
	Circuit breaker/fuse*	10 amps @ 12 V DC; 5 amps @ 24 V DC
INLET PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run**	3 ft./0.9 m max. from vacuum tank
DISCHARGE PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run	20 ft./6.1 m max. to holding tank
	Vertical run	6 ft./1.8 m max. to holding tank
REQUIRED COMPONENTS	Vacuum tank, VacuFlush toilet †	

\* Requires separate circuit breaker or fuse from other electrical equipment.

\*\* Must be parallel to or lower than vacuum tank discharge outlet.

† Purchased separately.

Specifications subject to change without notice.

S series vacuum pump

Vacuum tank

Available in 12 V DC and 24 V DC models

## Vacuum Tank (model VT)

This tank stores a vacuum force to instantly clear a VacuFlush toilet bowl with every flush. Connecting between a VacuFlush toilet and S or M series vacuum pump, it installs horizontally, vertically or suspended to accommodate special applications.

Vacuum tank

# VHT Vacuum Holding Tanks

## Big VacuFlush® Power for Small Boats

For performance boats and other trailerable boats with space too limited for typical marine toilet systems, VacuFlush VHT vacuum holding tank systems make it easy to install a complete VacuFlush toilet system on boats from 19 ft. (5.8 m) to 26 ft. (8 m) in length. VHT tank models integrate a vacuum pump, vacuum reservoir and waste holding tank into one easy-to-install unit. Compact in size, these VHT units deliver all the benefits of larger VacuFlush systems, providing a waste tank with as much flushing capacity as holding tanks that are sized for much larger boats.

### VHT4500 Vacuum Holding Tank

- 9-gal (34 l) VHT waste capacity holds as many flushes as 30-gal. (114 l) tank with standard marine toilet
- Corrosion-proof, leak-proof, odor-proof – high-density polyethylene construction
- “3/4” and “full tank” level sensors
- Auto “full tank” shutdown to toilet system prevents tank overflow
- Easy to plumb and install – no solvent-bond connection required
- Optional discharge pump models available

### Dimensions

### VHT4500 Technical Specifications

MODEL	DESCRIPTION	EMPTY WEIGHT*	FULL WEIGHT*
4501	9-gal./34-liter vacuum holding tank, straight discharge fitting (vertical)	30 lbs./14 kg	102 lbs./46 kg
4502	9-gal./34-liter vacuum holding tank, elbow discharge fitting (vertical)		
4511	9-gal./34-liter vacuum holding tank, swivel discharge fitting		

\* For models with discharge pump, add 8 lbs./3.6 kg.  
Specifications subject to change without notice.

VHT4511 with discharge pump (optional)

### VHT4500 System Requirements

ELECTRICAL	Power draw (avg.)	3 amps/12 V DC
	Circuit breaker/fuse	5 amps/12 V DC
INLET PLUMBING	ID	1.5 in./38 mm
	Horizontal run	20 ft./6.1 m max. from toilet discharge
	Vertical run	3 ft./0.9 m max. from toilet discharge
DISCHARGE PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe
	Horizontal run*	30 ft./9.1 m max. to discharge fitting
	Vertical run*	6 ft./1.8 m max. to discharge fitting
VENT HOSE	ID	5/8 in./16 mm sanitation hose
REQUIRED COMPONENT	VacuFlush toilet †	

\* When using VHT 4500 with SeaLand T series discharge pump (optional).

† Purchased separately.

Specifications subject to change without notice.

VHT12 Vacuum Holding Tank

- 6.5-gal (25 l) VHT waste capacity holds as many flushes as 17-gal. (64 l) tank with standard marine toilet
- Corrosion-proof, leak-proof, odor-proof – high-density polyethylene construction
- Models include “full” tank level sensor only, or “3/4” and “full” tank level sensors
- Auto “full tank” shutdown to toilet system prevents tank overflow
- Easy to plumb and install – no solvent-bond connection required

Recommended  
for Sailboats

# SailVac™ 5200 Vacuum Holding Tank

## Maximizes Capacity, Minimizes Water Use

SailVac™ 5200  
Vacuum Holding Tank

### Cruise Longer, Pump Out Less

VacuFlush® holding tank technology is now optimized for sailboats with a compact vacuum tank/holding tank featuring newly developed SailVac™ design. By engineering a vacuum generator and holding tank into a single, slim, hull-hugging unit, the SailVac™ 5200 now meets the demands of sailboat applications more effectively than other sailboat toilet systems.

Special SailVac design features include a tall, slim tank that curves and narrows to fit the outboard space that's typical of sailboat heads; an interior baffle system to protect vacuum components from wastewater at high angles of heel; and reinforcing ribs to prevent tank distortion while storing vacuum or during pump-out.

### Miserly Water Consumption Increases Cruising Time and Pleasure

With powerful vacuum propulsion, VacuFlush toilets use as little as one pint (0.5 l) of fresh water per flush. This allows more than three times the number of flushes than conventional marine toilets before holding tank capacity is reached, and also keeps sanitation hoses clear to prevent hose odor permeation.

### Premium Power Conservation

Boaters are keenly aware of power consumption. The SailVac 5200 meets tight power restrictions by requiring only three amps per flush from a 12V DC power supply. For optimum energy efficiency, install a VacuFlush pedal-operated toilet (not included) which requires no electrical connections. VacuFlush electric-flush toilets are also available.

### Key Benefits

- Compact unit incorporates vacuum pump, vacuum reservoir, and holding tank
- Vertical, curved profile for hull installation
- 14-gal. (53-l) tank capacity
- When used with VacuFlush toilet, provides tank capacity for two people for four days
- Roto-molded, 8 mm-thick polyethylene construction
- Corrosion-proof, leak-proof and odor-proof
- Thorough pump-out with diptube discharge from interior tank bottom
- Vent fitting connects to 5/8 in. (16 mm) ID hose
- 3/4- and full-tank sensor probes
- Auto shutdown relay turns off toilet system when tank is full to prevent overfilling
- Optional tank-level indicator panel.
- Deep green tank color

# HTS-VG VacuFlush® Holding Tanks

## Complete VacuFlush® Tank Systems In One Package

Virtually any boat from 25 feet (7.6 m) can feature a completely integrated VacuFlush toilet system by virtue of HTS-VG series holding tank systems. Our range of popular tank sizes and choice of convenience options make VacuFlush systems the most installer- and user-friendly toilet systems in motor yachts and other pleasure boats.

### HTS-VG VacuFlush Holding Tank Systems

- 12 standard, full-featured models for easy specifying and installing
- Corrosion-proof, leak-proof, odor-proof – high-density polyethylene tank construction
- “Whisper-quiet” vacuum and discharge\* pump operation
- All components are pre-wired, pre-plumbed, pre-tested
- Easy to install – no solvent-bond connection required
- ISO/USCG compliant tanks

\* Discharge pump not included with every HTS-VG model

# HTS SeaLand® Holding Tank Systems

## Odor-Free, Premium-Quality Performance

Boatowners can now realize the benefits of a user-friendly, properly-sized holding tank in virtually any Type III MSD system with this wide selection of SeaLand holding tank systems. Both HTS-T and Basic series use top-mounted fittings and diptube discharge plumbing to prevent potential leaks. Multiple discharge outlets eliminate need for complex plumbing and extra discharge line connections.

### HTS-T and Basic Series SeaLand Holding Tank Systems

- HTS-T models include T series discharge pump
- Corrosion-proof, leak-proof, odor-proof – high-density polyethylene tank construction
- “Diptube-style” discharge fittings for thorough, leak-proof pump-out
- All components pre-plumbed, pre-tested
- Easy to install – no solvent-bond connection required
- ISO/USCG compliant tanks

#### 10 HTS-T

# SeaLand® DTM Series Tank Monitor Systems

## Continuous Status of Onboard Waste System and Water Tanks

DTM04 tank monitor system

### Key Benefits

- Monitors empty, low, mid and full levels
- Continuous light indicates power is on
- No false readings. No electrical components contact water
- Easy to install. Two probe assembly length options fit tanks up to 22 in./55.9 cm and 45 in./114.3 cm tall
- Optional relay shuts down toilet when waste tank is full (DTM04); or shuts down water pump when freshwater tank is full (DTMF04)
- 12V DC or 24V DC operation

Accurate, continuous tracking of tank capacities is enjoyed by boatowners with our complete series of DTM tank monitors. Each DTM panel provides easy-to-read, distinctive LED illumination that indicate up to four levels of tank contents. Level probes install in SeaLand or other rigid tanks\* and are adjustable to desired level indication heights. DTM04, DTM08 and DTM12 panels can connect with DTD tank discharge control to offer convenient holding tank discharge options.

\* May require SeaLand Holding Tank Flange Kit, p/n 307230272.

### DTM04

DTM04 four-level tank monitor system for waste holding tank. Includes one set of tank probes.

### DTM08

DTM08 four-level tank monitor system for waste holding tank and freshwater tank. Includes two sets of tank probes.

### DTM12

DTM12 four-level tank monitor system for waste, graywater, and freshwater tanks. Includes three sets of tank probes.

### DTMF04

DTMF04 four-level tank monitor system for freshwater tank. Includes one set of tank probes.

### DTM01C

Single-level tank monitor system indicates when waste holding tank is full. Requires 3-in. dia. threaded tank opening for probe cap.

### DTM01

Single-level tank monitor system indicates when waste holding tank is full. Probe assembly installs on virtually any rigid tank material.

### Shut-down Relay

With DTM04 system, relay shuts off power to toilet when holding tank is full. With DTMF04 system, relay shuts off water pump when freshwater tank is empty. Plugs into back of indicator panel.

# SeaLand® DTD Series Tank Discharge Controls

## Allows Manual or Automatic Discharge Pump Operation

### DTD Tank Discharge Controls

Where overboard discharge of a waste holding tank is permitted, SeaLand DTD controls offer many options to match preferred methods of tank discharge operation. A key-operated switch allows the user to activate the discharge pump, or set the DTD panel for semi- or fully-automatic operation, depending on the DTD model. All panels include a green light that indicates when the discharge pump is running. DTD controls can be used with a discharge pump operating on the same voltage and a maximum circuit rating of 20 amps.

#### Key Benefits – DTD01, DTD02

- Manually activates pump to discharge holding tank contents directly overboard in unrestricted waters
- Green light indicates when discharge pump is running; reminds operator to shut off pump to prevent burn-out
- Keyed switch provides U.S. Coast Guard-approved security when key is removed; no padlocks or other mechanical fasteners are required
- When integrated with DTM04 tank monitor system, discharge pump automatically shuts off when tank is empty
- DTD02 panel provides warning indicator and prevents discharge pump operation if seacock is closed; prevents pump or boat damage

DTD01 discharge control

DTD02 discharge control with seacock warning light

#### Seacock interlock switch

Optional accessory connects to DTD02/A systems to prevent potential damage of pumping out against closed seacock.

#### DTD01 control options

- Manual discharge pump operation.
  - Semi-automatic operation when connected to DTM04 tank monitor system – automatically turns discharge pump off when tank is empty (see below).
- When DTM04 monitor indicates “full” holding tank, insert key in switch and turn to momentary “start” position. Allow key to return to “on” position. Green light indicates pump is running.
  - When tank monitor indicates “empty”; discharge pump will turn off automatically. Turn key to left and remove from switch.

#### DTD02 control options

- Manual discharge pump operation and “closed seacock” warning indicator.
  - Semi-automatic operation when connected to DTM04 tank monitor system – automatically turns discharge pump off when tank is empty (see below).
- When DTM04 monitor indicates “full” holding tank, insert key in switch and turn to momentary “start” position. If seacock is closed, the yellow warning light illuminates.
  - Open seacock for overboard discharge. Turn key to momentary “start,” and allow key to return to “on” position. Green light indicates pump is running.
  - When tank monitor indicates “empty” discharge pump will turn off automatically. Close seacock, then turn key to left and remove from switch.

# Fully Automatic SeaLand® DTD Systems

## Complete Holding Tank Management for Offshore Boats

Combined with SeaLand discharge pump and DTM04 four-level tank monitor system (sold separately), DTD01A or DTD02A tank discharge controls offer fully automated monitoring and discharge of holding tank contents. When re-entering restricted “no discharge” waters, the switch can be turned off and the key removed for U.S. Coast Guard-approved security.

### DTD01A\* and DTD02A control options

- A. Manual discharge pump operation and “closed seacock” warning indicator.
- B. Fully-automatic operation when connected to DTM04 tank monitor system and SeaLand discharge pump (see below).
  1. When in open waters and automatic pump-out is desired, insert key and turn to automatic power position. If seacock is closed, the yellow warning light illuminates.
  2. Open seacock for overboard discharge. As holding tank fills and “mid” level is reached, discharge pump is activated. Green light indicates pump is running.
  3. When effluent level activates “empty” tank probe, discharge pump automatically stops.

\* “Closed seacock” warning indicator functions do not apply to DTD01A.

DTD01A discharge control

DTD02A discharge control with seacock warning light

**DTD Panel Dimensions – all models**  
3.25 in. w x 3.25 in. h / 83 mm x 83 mm

### Key Benefits – DTD01A, DTD02A

- Automatically discharges holding tank contents directly overboard in unrestricted waters
- Automatically shuts off pump when discharge is complete
- DTD02A panel provides warning indicator and prevents discharge pump operation if seacock is closed; prevents pump or boat damage

# SeaLand® Waste Discharge Pump

## Reliable Offshore Waste Tank Discharge

T series  
discharge pump

### T Series Waste Discharge Pump

For premium tank discharge performance, SeaLand T series pumps provide unsurpassed quality and reliability. Unlike impeller-type macerator pumps, the bellow-style T pump can run dry without threat of damage. Drawing only 6 amps at 12V DC.

In waters where overboard discharge of a waste holding tank is permitted, the T pump integrates with Dometic Tank Discharge (DTD) control systems\* for completely automated holding tank discharge.

\* Purchased separately

### T Series Pump Requirements

ELECTRICAL	Power draw (avg.)	6 amps @ 12 V DC; 3 amps @ 24 V DC
	Circuit breaker/fuse*	10 amps @ 12 V DC; 5 amps @ 24 V DC
PLUMBING	ID	1.5 in./38 mm sanitation hose or PVC pipe

\* Requires separate circuit breaker or fuse from other electrical equipment. Specifications subject to change without notice.

### Discharge and Suction Lifts (ft./m)

Discharge	0 / 0	2 / 0.6	4 / 1.2	6 / 1.8	8 / 2.4	10 / 3
Suction	10 / 3	8 / 2.4	6 / 1.8	4 / 1.2	2 / 0.6	0 / 0

### Discharge Pump Model Specifications

MODEL	DESCRIPTION	WEIGHT*
317301200	12V DC T series discharge pump	7 lbs. / 3.2 kg
317302400	24V DC T series discharge pump	7 lbs. / 3.2 kg
314115012	12V DC SaniSump sump pump	10 lbs. / 4.5 kg
314115024	24V DC SaniSump sump pump	10 lbs. / 4.5 kg

\* Weight may vary  $\pm$  2-3 percent. Specifications subject to change without notice.

### Key Benefits

- Produces 300 gph (1136 lph) flow rate
- Runs dry without harm (prevents motor burn-up)
- Self-priming to 10 feet (3.3 m) of water
- Draws only 6 amps at 12V DC

### SaniSump™ Sump Pump

Great for fish box or other small, closed graywater systems. Includes 0.6-gallon (2.3-liter) collection tank.

- Passes solids up to 0.5 in. (13 mm) in diameter
- Delivers 5 gpm (18.9 lpm) flow rate
- No messy screen to clean

# SeaLand® Sanitation Hoses

## Premium Resistance to Odors; Versatile Uses

For every type of marine sanitation hose a boat builder may need, Dometic provides the most complete selection of grades and sizes available. OdorSafe® Plus hose continues to prove its superior quality as compared to other “no odor” hoses, delivering up to 500% greater protection against odor permeation. And MaxFlex™ hose is available in various sizes to meet all other sanitation and vent hose requirements.

### OdorSafe® Plus Sanitation Hose

- Best odor barrier of any marine hose
- Five year limited warranty – two years on hose replacement and labor; three additional years on hose replacement only
- Standard component on pre-plumbed SeaLand holding tank systems that require sanitation hose
- Available in 50 ft. (15.2 m) coils only

OdorSafe Plus  
sanitation hose

### MaxFlex™ Sanitation and Vent Hose

- Outstanding flexibility allows tight corners without restricting flow
- High strength, yet easy clamping for airtight connections
- Four diameters meet versatile sanitation hose applications
- Most sizes available in 50 ft. (15.2 m) and 100 ft. (32.4 m) coils

MaxFlex  
sanitation hose

### SeaLand Sanitation Hose Order Information

ITEM NUMBER	DESCRIPTION
306342871	OdorSafe Plus 1.5 in. (38 mm) ID x 50 ft. (15.2 m) hose

### Dometic Hose Lubricant

Silicone grease, translucent white, odorless.

- Allows easier sanitation hose-to-fitting connection
- 0.2 oz. (6 g) tube

ITEM	DESCRIPTION
385320014	Dometic hose lubricant – 50 tubes/carton

# SeaLand® ECO Holding Tank Vent Filter

## Advanced Odor Removal – Easy to Install & Replace

With the first major change to the original SeaLand vent filter in over 25 years, Dometic delivers everything boaters want in vent filter performance and serviceability.

The **innovative concave shape** of the SeaLand ECO vent filter assures that malodorous gases are completely filtered through activated odor-adsorbing charcoal media. The result is more thorough odor elimination – and the assurance of more enjoyable boating.

Designed as a **direct replacement for previous SeaLand and Dometic vent filters**, the new ECO vent filter fits in the same installation brackets as older models. Hose adapters for the most popular vent hose sizes are included with the complete vent filter kit (309311001). Threaded adapters are also included for replacement on many older SeaLand holding tank systems with built-in vent filter.

**Now constructed using recyclable plastics**, all SeaLand ECO filter components are much more ecologically friendly than previous SeaLand filters and many other current vent filters. The polypropylene hose adapters (plastic #5) for hose sizes or connections that are not needed for an installation can be immediately recycled. The eventually-replaced filter cartridge – made of HDPE (plastic #2) – can also be recycled when properly disposed.

The universal filter cartridge, **made with 55% less plastic than previous filter cartridges**, fits ALL OE-installed SeaLand ECO vent filters regardless of the vent hose size for easy replacement.

### Key Benefits

- Improved malodorous gas filtration
- New filter cartridge uses **55% less plastic** than previous SeaLand vent filter cartridge
- Earth-friendly, recyclable plastic components
- Fits in same space and brackets as previous SeaLand vent filters for easy change-over
- Complete kit includes fittings for popular vent hose ID sizes: 5/8 in., 3/4 in., 1 in., 1-1/2 in. (16mm, 19mm, 25mm, 38mm)
- One replacement cartridge fits all SeaLand ECO filter sizes

### Replaces previous Dometic/SeaLand vent filters\*

1. Remove spent vent filter cartridge from vent hose. **Do not cut hose.**
2. Attach provided hose ID adapters that match vent hose ID or threaded adapters to new ECO vent filter cartridge with retaining fasteners.
3. Install new ECO vent filter into existing SeaLand bracket.
4. Attach new ECO vent filter to existing vent hose with hose clamps or threaded adapters.

\* Includes most filters installed as part of a SeaLand HTS tank system.

### Dimensions

### SeaLand® ECO Vent Filter Specifications

MODEL	DESCRIPTION	ADAPTER FITTING SIZES *

309311002	Vent filter replacement cartridge only	DNA

\* Vent hose ID sizes required for installation. Specifications subject to change without notice.

# SaniGard™ Holding Tank Vent Filter

## More than 2.4 times better odor adsorption

While newer style vent filters from other manufacturers have been recently developed, none have proven to be more effective at malodorous gas adsorption than the original SeaLand SaniGard™ vent filter. Our finely calibrated filter media remove the source of offensive odors from vent lines over 2.4 times better than the closest rated competitive filter.

Chart indicates calculated capacity in grams of carbon disulfide that are adsorbed by each laboratory-tested\* vent filter. Based on this data, SeaLand SaniGard vent filters will outlast competitive filters by factors of 2.4 to 12.6 times longer.

\* Vent filter tests conducted by Intertek Group, Chicago, IL, USA.

### For optimum vent filter performance:

- Replace vent filter cartridge at beginning of every boating season.

Do not use "retrofit" kits or other less-effective filters. Dispose of complete expired cartridge and replace with authentic SaniGard vent filter – it's the safest and surest way to long-lasting odor-free, trouble-free performance.

- Do not overfill holding tank – empty it on a regular basis.

Risk of flooding and deactivating a vent filter exists if holding tank contents enter the vent line. Install SeaLand tank level monitor system to help prevent waste tank overflow.

## SeaLand® SaniGard™ Vent Filter Specifications

MODEL	DESCRIPTION	FITTING SIZE *
309310002	Vent filter cartridge, mounting bracket, hardware	5/8 in. - 16 mm
309310001	Vent filter replacement cartridge only	5/8 in. - 16 mm
309310007	Vent filter cartridge, mounting bracket, hardware	3/4 in. - 19 mm
309310005	Vent filter cartridge, mounting bracket, hardware	1 in. - 25 mm
309310006	Vent filter replacement cartridge only	1 in. - 25 mm
309310003	Vent filter cartridge, mounting bracket, hardware	1-1/2 in. - 38 mm
309310004	Vent filter replacement cartridge only	1-1/2 in. - 38 mm

\* Vent hose ID required for installation.  
Specifications subject to change without notice.

**CAUTION** – Do not use SaniGard vent filter for holding tanks with waste that is treated through onboard sewage treatment systems using chlorine or other strong oxidizing agents.

### Dimensions

### Installation Diagram

# How VacuFlush® Toilets Raise Your Level of Comfort

Most boaters find that VacuFlush systems offer many advantages that result in homelike comfort and superior, long-lasting performance compared to other marine toilets.

## Fresh Water Flushing Stops Odors

Raw water flushing systems contain organisms that die and decay. Low-flow VacuFlush systems use clean, fresh water, thereby eliminating chances for odors.

## Look and Performance of Household Toilets

Adult-size seats, deep bowls and large water surfaces of many VacuFlush toilets make them extremely comfortable and easy to use.

## Minimal Water Use For Fewer Pump-outs

Using very little water per flush, VacuFlush systems preserve onboard water supplies and greatly increase the number of flushes between holding tank pump-outs.

## Low Power Use

Pedal-operated VacuFlush toilets draw a mere 2-6 amps per flush, and electronic flush models use only 7 amps more – comparing favorably to other systems that use upwards of 60 amps.

## Powerful Vacuum Cleans Bowl and Lines

A vigorous combination of air and water flow clear the toilet bowl instantly and keep plumbing lines open – reducing chances of hose odor permeation.

## Unbeatable Reliability

By eliminating the problems associated with raw water systems, VacuFlush systems require less maintenance and extend component life significantly.

## VacuFlush Testimonial

"I had two VacuFlush systems installed in 1988 when I commissioned the building of ALFIN II, a Brewer 44 sloop, cutter rig. I have experienced 23 years of odor-free, trouble-free bliss while cruising over 30,000 miles and 12,000 hours on the engine. These are irreplaceable items in any boat."

--Augusto (Kiko) Villalon, St. James City, Florida USA

## Enhanced Resale Value

Sparkling vitreous china toilets and a powerful vacuum sanitation system reflect a higher standard of quality and increase the value of boats.

## Complete Toilet Systems from One Source
